Connectivity

TOUCHSCREEN INTERFACE

Wide 22" touchscreen with an intuitive and fast interface for efficient work even with gloves and dirty or wet hands.

TOUCHSCREEN

SMART ARM PRO

Advanced digital gauge for rims up to 28", with **FSP** function that automatically activates balancing programs, minimising on-screen selection operations.

The **LaserDot** pointer guides the operator in the selection of the alloy rim internal planes with excellent visibility and absolute precision.

SMART-ARM PRO

Fast - No measurement errors - Clear and immediate visual guidance - Maximum smoothness.

AUTOMATIC POSITIONING AND LED LIGHT

At the end of the spin the wheel is braked and automatically brought to the balancing position **(RPA)**.

The integrated LED light illuminates the work area to facilitate rim cleaning and application of the counterweights

RPA

LED LIGHT

CORGHI

LASER DOT

Thanks to the integrated laser technology, the **LaserDot** pointer precisely indicates the exact spot where the adhesive counterweights are to be applied, eliminating any margin of error during correction.

The operator can position them quickly and intuitively, using the laser or the weight holder CLIP, according to preference.

Software: LDS - Laser Dot System

Immediate precision - Error-free positioning - Maximum operating speed

SONAR AWD

Sonar system (optional) for automatic wheel width measurement.
Fast - Precise - Contactless

AVAILABLE WHEEL CLAMPING OPTIONS

A_Manual clamping with quick nut (EM9680) - Manual system with quick nut: a simple, reliable and ideal solution for workshops that prefer direct control during wheel clamping.

B_Automatic PneuLock clamping (EM9680 C) - Automatic constant torque technology that ensures precise and repeatable tightening, reducing operating time and improving centring. Perfect for intensive workflows.

C_Automatic Winut clamping (**EM9680 C Winut**) - With the Winut system, clamping is activated by pressing a single button on the sleeve, without the use of a pedal. Maximum speed, comfort and simplicity in every work cycle.

PNEULOCK

WINUT — PATENTED

A   B   C
WEIGHT MANAGEMENT PLUS

Reduce working time by up to 20% and the use of counterweights by up to 30%, with immediate economic and environmental benefits. A program designed for those aiming for faster, sustainable wheel balancing.

Thanks to the three on-screen counters, you can monitor your weight, time and money savings in real time.

More efficiency - Less waste - Zero complications

SONAR RUN-OUT & BEST FIT

Diagnosis system for wheel radial run-out that causes vibrations that cannot be fixed with a simple wheel balancing.

The presence of the sonar run-out sensor automatically activates the new **BESTFIT** software function which indicates on the screen the point of highest wheel run-out and suggests how to mount it on the hub of the vehicle, before tightening the bolts, in order to eliminate vibrations directly during the assembly on the vehicle.

INTELLIGENT POSITIONING LITE

iPos LITE — **INTELLIGENT POSITIONING**

A special vehicle tyre set diagnostic tool for checking run-out and imbalance.

Once all the wheels are memorised, the wheel balancer suggests their best placement on the vehicle placement of the wheels themselves on the vehicle for maximum comfort and safety. **Complete diagnosis if equipped with sonar run-out.**

WATCH THE VIDEO

All useful programs available for the professional: **HIDDEN WEIGHT, BIKE SPLIT, OPT FLASH**.

USB PORTS AND LAN

USB ports for connection to peripheral devices and easy software upgrading.

**LAN port** for connection to your company network.

USB UPDATE

WE NEXT

Compatible with the WeNext platform.

wenext READY

INCLINED FRONT PART

Inclined front part to improve operator access to the inside of the rim.

PR ZERO

SPACE-SAVING WHEEL CASING

Space saving wheel guard (**patented**) designet to allow the positioning along the wall, it alsoo permits to hold wheels up to **44"** (1.118 mm) **maximum diameter**.

TECHNICAL DATA

Mains power voltage	**115÷230V - 1ph - 50/60Hz**
Total power consumption	**400 W**
Balancing speed	**75-85-98 rpm**
Maximum imbalance value	**999 g 35,3 oz**
Resolution	**1 g - 0,0353 oz**
Average measurement time	**(14 kg wheel) 5,5 s**
Shaft diameter	**40 mm - 1,57"**
Settable wheel width range	**1,5" ÷ 20"**
Settable wheel diameter range	**1" ÷ 35"**
Measurable wheel diameter range	**10" ÷ 28"**
Maximum wheel width (with guard)	**600 mm - 23,6"**
Maximum wheel diameter (with guard)	**1118 mm - 44"**
Maximum wheel/machine distance	**275 mm - 10,82"**
WINUT device working frequency	**2.4 GHz**
Maximum radio frequency signal strength	**100mW**
Wheel weight	**85 Kg**
Compressed air pressure (EM 9680C)	**7 ÷ 10 bar (105 ÷ 165 psi)**
Machine weight	**140 kg**
