

## Category

## Content for product line

## Type

## Course content:

- ▶ Complete diagnosis procedure on roller simulating wheel on road
- ▶ Plysteer procedure for tyre conicity and drift measurement
- ▶ Rim and tread depth diagnosis procedure
- ▶ Match-Mounting procedure and use of the diagnosis roller
- ▶ Theory and explanation of wheel deformation terminology (eccentricity, Plysteer, radial force, lateral force, drift, wobble)
- ▶ Wheel demounting and mounting procedure

## Language

## Duration

## Notes:

FREE for Technology Partner customers

[www.corghitechnologypartner.eu](http://www.corghitechnologypartner.eu)

## Necessary preconditions:

-----

## At the end of the course the participant will be able to:

- ▶ Fully exploit the diagnostic tyre changer potential
- ▶ Perform a complete diagnosis and analyse the wheel behaviour on the road
- ▶ Apply the correct procedure for conicity and drift measurement
- ▶ Use diagnostic programs and perform Match-Mounting on the wheel
- ▶ Identify wheel deformations
- ▶ Perform wheel demounting and mounting procedures correctly

## Price for the course

per person  
VAT NOT INCLUDED
