

The wheel aligner for everyone Fast, precise and extremely reliable!

Advanced wheel aligner featuring an integrated camera movement system with manual operation, designed to ensure precision, reliability and ease of use at every stage of work.

The design provides for a presetting for an additional monitor or A4 printer. It is also compatible with a **trolley** and incorporates a practical clamp holder, designed to improve ergonomics and organisation of the workstation.

All components are made from **high-quality materials** and with a **modern design**, in line with Corghi's high construction standards. **EXACT LINEAR E PLUS** introduces intuitive and easy-to-use **software** that enables **rapid and precise alignment**, with detailed data display up to **0.01°**. The interface simplifies the operator's work thanks to easily accessible tutorials.

Access to the main setting values is immediate, reducing intervention time and increasing efficiency.

NEW

EASY TO USE

Simple graphics with Corghi icons.

Simple and efficient, easy to learn, quick to select.

Main unit

Complete with integrated mini PC and worktop

Handle

for the movement of the camera beam.
Fast and precise movement.

Lightweight target

High-resolution

It can be detached from the clamp and is compatible with all clamps in the catalogue. Front infrared filter for enhanced immunity to solar reflections.

Superior quality camera

Latest generation high-resolution HI-Q camera

For machine vision. **Operating light indications** thanks to the integrated synoptic panel.

Measurement by image difference.

Each acquisition is differentially processed by two consecutive images to eliminate measurement problems in critical sunlight conditions or in the presence of light reflections.

CLAMPS FROM 10" TO 26"

With adapter (optional).

Lock release

Release pedal for the camera mover locks.

New integrated lifting system and manually operated safety system

Quick and easy

The camera movement kit allows the operator to work from the pit to a height of more than 2 metres. Integrated safety system, with quick release of the locks by foot pedal operation.

New software for the wheel alignment professional

New modern and professional graphic interface

specially developed for the wheel alignment specialist. Rich with **new features**, such as the lower progress bar, the **convenient** vertical pop-up selection **menu**, and enhanced data visibility in the operating area. It also features **useful quick selection icons** for the most common functions and simple wizards with clear instructions for less experienced operators. The procedure is fully customisable with an always up-to-date and comprehensive database.

- Multilingual Windows IoT operating system;
- User-friendly procedures;
- Extraordinary international database with more than **84,000 vehicles** included;
- Real-time **graphic indications**;
- **User database** for entering or changing vehicle data;
- **Factory calibrated**, only calibration verification is required during installation
- Database on **hard disc**;
- **Customer's database** for specific activities, to recall and save all customer data;
- **A.I. Intelligent** algorithm identifies critical angles, suggests corrective actions, and optimizes compensation of non-adjustable elements.

With the **CloudNext** service, the software is always updated to the latest available release.

WHEEL ALIGNER COMPATIBLE WITH PROADAS

The wheel aligner is compatible with the **PROADAS** universal system used for the calibration of driver assistance systems on new generation vehicles.

Using the wheel aligner cameras, the **system for calibrating the camera and radar on board the vehicle** can be aligned **precisely and quickly**.

Manufacturers recommend calibrating ADAS systems after aligning the vehicle.

For further information, visit the PROADAS product sections on our website.
